10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

As a software product Company, the impact that the Company has on the environment from its own operations is relatively low when compared to companies in other industries. However, the Company recognizes that it still has a role to play in reducing the impact that global business has on the environment. Subex is committed to following the best practices to reduce utilization of power, natural resources like water and limited E-Waste disposal, executed through government recognized agencies. Though Subex does not fall under the category of manufacturing products and services impacting the environment, we implement few of the best practices with minimal investments through a five-year planagreement with an industry stalwart having expertise in energy conservation. This investment thereby results in monetary benefits / savings month on month, helping us recover the invested amount in few months, ensuring continued savings through this initiative.

Subex aims to reduce its impact on the environment by:

- 1. Monitoring the level of water and energy used along with the waste produced.
- 2. Targeting a reduction in the use of plastics, electricity and water, along with an increase in amount of waste that is recycled/reused etc.
- 3. Increasing the awareness on environment safety and engagement of employees in such measures.
